

North Shore Grill

A vacation just down the road!

Spend some time at the area's only tiki bar, order a bucket of seafood on the deck, have a mojito and relax. You're on vacation!

This weekend we are featuring:

NSG Famous Seafood Bucket

Our bucket includes
1 1/4 ~ 1 1/2 lb lobster
Little Neck Clams
Peal & Eat Shrimp
Salt Potatoes and Corn on the Cob!

Red Snapper

The moist, white flesh of the red snapper has a delicate sweet flavor. The red snapper commonly inhabits waters from 30 to 200 ft , but can be caught as deep as 300 ft (100 m) or more on occasion. They stay relatively close to the bottom, and inhabit rocky bottom, ledges, ridges, and artificial reefs, including shipwrecks. Like most other snappers, red snappers are gregarious and will form large schools around wrecks and reefs. These schools are usually made up of fish of very similar size.

Halibut

Eaten fresh, the meat has a very 'clean' taste and requires little seasoning. Halibut is also noted for its very dense and firm texture.

They are gray-black on the top side with an off-white underbelly. At birth they have an eye on each side of the head, and swim like a salmon. After about 6 months one eye migrates to the other side, making them look more like other flounder. At the same time the stationary-eyed side darkens to match the top side, while the other side remains white. This color scheme disguises halibut from above (blending with the ocean floor) and from below (blending into the light from the sky) and is known as countershading.

A vacation just down the road!

My wife, Jen, and I lived on the coast in New England and enjoyed great seafood and the vacation atmosphere of the waterfront restaurants. We have tried to duplicate that

vacation atmosphere at the North Shore.

Live Well, Laugh Often, Eat Seafood !
